PROFESSIONAL PROFILE

Senior technical leader with 26 years of enterprise IT and Service Delivery Management experience. In the earlier part of my career (PeopleSoft – Oracle Toronto, British Telecom London, UNHCR Budapest) I led the design, development, integration and upgrade of global PeopleSoft HCM/CRM systems — including a strategic PeopleSoft → Workday data migration project. Since 2025, co-owner of MyForge Labs Kft., where I lead the development of AI-assisted multi-tenant SaaS products. Core strength: **enterprise-grade delivery experience and modern technology execution in a single operator.**

HIGHLIGHTS

- 26+ years of PeopleSoft technical consulting and Service Delivery Management — UNHCR (10 years), British Telecom (7 years), PeopleSoft – Oracle (6 years).
- Led the UNHCR PeopleSoft → Workday data migration (2022–2024) — data integrity, security, business continuity.
- Designed and rolled out multi-tenant SaaS architecture — PostgreSQL Row Level Security, audit trail, immutable state-machine pattern.
- Introduced AI-assisted development pipeline — LLM tooling, prompt engineering, MCP-based tool integration in client projects.

TECHNOLOGY

AI & WORKFLOW

- LLMs (Claude, GPT, Gemini) — prompt engineering, agent orchestration
- Claude Code (CLI + IDE), MCP — custom tool integration
- Process automation: agentic stacks, n8n

BACKEND & ARCHITECTURE

- NestJS, TypeScript strict, Prisma, PostgreSQL (RLS)
- Multi-tenant SaaS pattern, BullMQ, Redis, MinIO
- PeopleTools, PeopleCode, Application Engine, Integration Broker

FRONTEND & PWA

- React, Vite, shadcn/ui (Radix), Tailwind
- PWA Service Worker, IndexedDB offline mode, multi-language i18n
- Accessibility (WCAG a11y), mobile-first responsive

DEVOPS & INFRA

- Monorepo: pnpm + Turborepo, Docker, GitHub Actions
- Hetzner / Hostinger VPS, Caddy, monitoring stack
- Stryker mutation testing, fast-check property tests

LEADERSHIP COMPETENCIES

- Service Delivery Management — cross-functional team leadership
- Architecture decision-making, technical-debt management
- Stakeholder management — client-source-driven scope decisioning
- Multi-tenant SaaS architecture, audit trail design
- Mentoring, technical writing, onboarding documentation
- Vendor selection, IT audit, technology decision support

EXPERIENCE

MyForge Labs Kft.

2025 – present

Senior IT Solution Engineer / Co-Owner · Budapest

- Company strategy and business model — positioning AI-assisted multi-tenant SaaS products, client acquisition, portfolio growth.
- Leading AI integration — embedding LLM-based assistants and generative-AI tools into client workflows.
- Multi-tenant SaaS architecture — modern monorepo (pnpm + Turborepo), NestJS + Prisma + PostgreSQL RLS + React + Vite PWA.
- Production-grade RLS and quality assurance — property-test cross-tenant invariants, mutation-testing gate.
- Team and subcontractor leadership, deadline and budget control, client-portfolio management.

UNHCR (United Nations High Commissioner for Refugees)

2014 – 2024

Service Delivery Manager — PeopleSoft · Budapest, HU

- Owned the delivery of PeopleSoft services — system upgrades, patch management, integrations with enterprise systems.
- Led the team of technical consultants, ensuring high customer satisfaction.
- Stakeholder coordination (HR / IT / Finance) — translating business requirements into actionable delivery plans.
- Led data migration for the UNHCR PeopleSoft → Workday upgrade (2022–2024).

- Post-implementation reviews, system performance optimization.

British Telecom

2006 – 2013

HCM Systems Engineer and Service Delivery Manager · London, UK

- Operated the PeopleSoft HCM environment — performance, stability, security.
- Coordinated the rollout of new PeopleSoft modules and system upgrades, minimizing business disruption.
- Developed integration solutions between PeopleSoft and other enterprise systems (seamless data flow, process automation).
- Performance tuning, patch management, cross-functional team coordination.

PeopleSoft – Oracle

2000 – 2006

Senior PeopleSoft Technical Consultant and Upgrade Specialist · Toronto, CAN

- Provided technical leadership for PeopleSoft applications — design, development, implementation.
- Module customization (PeopleTools, PeopleCode, Application Engine) — tailored client solutions.
- Integration with Integration Broker and middleware technologies.
- Led multiple successful PeopleSoft upgrades (version upgrades, PUM updates).

EDUCATION

Ryerson University

1996 – 2000

Information Technology Management, BA · Toronto, Canada

CERTIFICATIONS

- PeopleSoft Certified Technical Consultant
- PeopleSoft Certified CRM Consultant

LANGUAGES

- Hungarian — native
- English — professional, fluent (26 years in international Toronto / London / Budapest environments)
